Maîtrise d'études avancées
Master of Advanced Studies

Toxicology

September 2016 – June 2018

The only part-time curriculum in toxicology in Switzerland compatible with the needs of scientists already in employment

14 modules over 2 years taught in english and a master project |
4 days of teaching per module | Partly through e-learning

Objectives

- Provide specialist education and training in toxicological sciences and risk assessment with a focus on human toxicology, leading to a recognized academic qualification.
- Fulfil the educational requirements of national and international professional bodies towards registration as a toxicologist.

Audience

Medical doctors, biologists, veterinarians, pharmacists, biochemists, chemists, biologists, and other professionals involved, or wishing to gain skills and knowledge, in the field of toxicology.
