

Research Seminars 2015

Research Center for Statistics

23 January 2015

William Aeberhard, GSEM

Thesis defense

Contributions to Overdispersed Count Data Modeling: Robustness, Small Samples and Other Extensions

27 February 2015

Julie Josse, Agrocampus Ouest, Rennes, France

13 March 2015

Reto Bürgin, GSEM

Testing coefficient constancy in mixed models

27 March 2015

Martin Schlather, Universität Mannheim, Germany

Models for Multivariate Geostatistics

17 April 2015

Tatyana Krivobokova, Georg-August-Universität Göttingen, Germany

Partial Least Squares for Dependent Data

Reto Bürgin, GSEM

Thesis defense

Tree-based methods for moderated regression with application to longitudinal data

8 May 2015

Marco Carone, University of Washington, USA

Summarizing the association between disease onset and survival undercross-sectional sampling

15 May 2015

Alastair Hall, University of Manchester, UK

The Asymptotic Behaviour of the Residual Sum of Squares in Models with Multiple Break Points

22 May 2015

Alexandros Kalousis, University of Applied Sciences, Western Switzerland

SVMs meet metric learning

18 September 2015

Maria Dolores Martinez Miranda, University of Granada, Spain, and Cass Business School, UK
Do-validating local linear hazards

2 October 2015

Thomas Kneib, Georg August-Universität Göttingen, Germany
Bayesian Structured Additive Distributional Regression

16 October 2015

Davide La Vecchia, GSEM
Higher-order asymptotics for frequency domain M-estimators

23 October 2015

Victor Panaretos, École polytechnique fédérale de Lausanne (EPFL), Switzerland
Amplitude and Phase Variation of Point Processes

30 October 2015

Guillaume Dehaene, University of Geneva, Switzerland
Expectation Propagation is exact in the large data limit

13 November 2015

Giulia Cereda, University of Lausanne, Switzerland
Non parametric Bayesian approach to LR Assessment in case of rare type match

27 November 2015

Heather Battey, Imperial College London, UK, and Princeton University, USA
Distributed estimation and hypothesis testing with statistical guarantees

4 December 2015

Daniel Chen, Institute for Advanced Studies, Toulouse School of Economics, France, and Labor
Worklife Program at Harvard Law School, USA
*The Deterrent Effect of the Death Penalty? Evidence from British Commutations During World War
I*
