FACULTÉ DES SCIENCES

Post-doctoral research assistant

A post-doctoral research assistant position is available at the Institut F.-A. Forel for a two-year term, starting from January 2008. The successful candidate will join a well-established research group working on trace element mobility and bioavailability in lakes and reservoirs. He/she will be specifically responsible for all the aspects connected to the study of physical and chemical Hg speciation in various environmental matrices (water, pore water, sediments, and aquatic organisms). The candidate should hold a PhD in environmental chemistry/geochemistry and be familiar with ultraclean sampling and analysis protocols. Priority will be given to candidates with demonstrated expertise in mercury analytical techniques applied to environmental studies; especially GC/AFS (equipment available) and MC-ICP-MS (external cooperation to establish). Knowledge of French is desirable, but not mandatory.

Applications accompanied by CV, list of publications, letter of motivation and names of three references should be sent to:

Mme Françoise Wyss, Secretary, Institut F.-A. Forel, Université de Genève, 10 rte de Suisse, CP 416, CH-1290 Versoix, e-mail :Francoise.Wyss@terre.unige.ch, before November 1st, 2007.
