

IMAGE OF THE MONTH Competition goes on !

Every month, the **Photonic Bioimaging** Team will chose the top microscopy image or movie taken at our facility that you submit to us and publish it on our web page.

At the end of the year, a committee will select the three best images/movies of the year and their authors will be awarded a prize.

To participate in the competition, simply send us (e-mail or SWITCH File-Sender if too big) your best shot or time-lapse acquired at the Photonic Bioimaging Center. Please add a short figure legend. It can be processed or modified as the artistic criteria are as important as purely scientific ones. The higher the resolution and size of the image, the better, but content and aesthetic is more important.

We look forward to receiving your best productions !

Application & information
