MOODLE : Tutorial no.5

Organise your course with sections

To support continuity of teaching and learning for students
Section: A consolidation of your course resources and educational activities. It allows you to structure your course logically and temporally. There are two ways to structure your course by section.

Sections based on topics
Organise educational resources and activities by theme or topic

Sections based on weeks
Organize the course sessions according to the chronological sequence of the sessions
Step 1. Activate edition mode
Step 2. Add one or more sections

NB: when you create a course, 3 sections will automatically appear.
Step 3. Decide on the number of sections

NB : in general, we use one section per class (cf. next slide)
Step 4. Rename sections

Click on the pencil.
Write down for example the subject and date of the course of the day
You have now created sections!
You have created and named sections on Moodle

Now go to Tutorial 6:

“Communicate with your students using Forum”
