## Information to Researchers

1. The administered questionnaire is only valid to define extremes of game play by category or video game genre; For example, contrasting action video game players (AVGPs) with non-video game players (NVGPs). It is **NOT** appropriate for continuous measure of weekly hours of video game play. Hourly reports are not reliable as sampled - see Green et al. (2017) for a discussion of this point
2. Video game genres as classified in the questionnaire keep evolving by integrating different game design mechanics. In the cognitive neuroscience literature, the term “action video game players” is used to refer to only first and third person shooters. Yet, it tends to now be more encompassing of other genres that also integrate some of the identified action mechanics into their game play. The AVGP criteria below reflect that shift. This state of affairs has several consequences.
  - a. From that point of view, be aware that it would not make sense to contrast AVGP as defined below to Action\_RPG, or Sport/Driving or RTS/MOBA.
  - b. Some game titles have changed categories between their different releases (e.g. Warcraft). The experimenter should thus verify the exact classification of a specific video game *title AND version* on this wiki on game genres if unsure (e.g., Warcraft I, II and III in RTS, whereas World of Warcraft (IV) is an MMPORG. Link to the wiki : [https://en.wikipedia.org/wiki/List\\_of\\_video\\_game\\_genres](https://en.wikipedia.org/wiki/List_of_video_game_genres))
  - c. Fortnite can have different play modes :
    - Fornite *Battle Royale* and *Save the World* game modes fall under Action\_First/Third
    - Fortnite *Creation* (“building”) game mode, ( as well as Minecraft) fall under Turn Based Strategy/LifeSim/Puzzle
3. Because VG questionnaires are not systematically administered at the time of data collection and video game play may have changed, it is critical to keep the delay between administration of the VG questionnaire and participation in other tasks as short as possible. To be included in a study as an AVGP or NVGP, a VG questionnaire leading to the respective qualification needs to have been collected less than 3 months before the data collection.

### LOW Tweener criteria

While most studies in the literature have used NVGPs for training studies, these are nowadays so rare that “low tweeners” are also being considered as training participants. “Low tweeners” are selected for low action game experience AND for moderate experience in game play AND for non-expert experience in any game genre.
