Research website: www.isabelle-collet.net

Isabelle Collet had a degree in computer science. She supported in 2005 a PhD in Education at the University Paris-Ouest Nanterre La Defense on "The masculinization of computer studies". She is now a associated professor on gender and education issues at the University of Geneva. She leads the Gender and Intersectional Relations research group in training and education (GRIFE-GE). She is a research associate at the Institute of Gender Studies at the University of Geneva.

In 2006, she received an award from the French Academy of Moral and Political Sciences. She is President of ARGEF, the Gender Research Association for Education and Training and funder of GEF, Journal of Gender and training in education

After having worked on the question of gender in science and technology, she now explores the issues of co-educational education and how the different social relationships intersect in the field of education and training. Her interventions with teachers and future teachers focus on the implementation of a true pedagogy of equality.
