

# Meet the team

## Editor-in-chief

**Peter Vikesland** Virginia Tech, USA

## Associate editors

**John Fortner** Washington University in St Louis, USA

**Zhang Lin** South China University of Technology, China

**Iseult Lynch** University of Birmingham, UK

**Joel Pedersen** University of Wisconsin-Madison, USA

**Kristin Schirmer** Swiss Federal Institute of Aquatic Science and Technology, Eawag, Switzerland

**Wei-Guo Song** Institute of Chemistry, Chinese Academy of Sciences, China

## Editorial board members

**Greg Lowry** Carnegie Mellon University, USA

**Jerome Rose** European Centre for Research and Teaching in Environmental Geosciences, France

**Nathalie Tufenkji** McGill University, Canada

**Frank von der Kammer** University of Vienna, Austria

## Executive Editor

**Simon Neil** Royal Society of Chemistry

## Deputy Editor

**Emma Eley** Royal Society of Chemistry

## Editorial Production Manager

**Claire Darby** Royal Society of Chemistry

## Environmental Science portfolio

*Environmental Science: Nano* is published alongside its two sister journals:

*Environmental Science: Processes & Impacts* – a multidisciplinary journal for the environmental chemical sciences

*Environmental Science: Water Research & Technology* – innovation for sustainable water

More details about the environmental science portfolio can be found at [rsc.li/envsci](https://rsc.li/envsci)

# For the future of the chemical sciences

We are a non-profit organisation with a reputation strengthened over 177 years. However you work with chemistry, we exist to support you – for the benefit of science and humanity.

As a society publisher, we provide access to cutting-edge chemical science content through books, journals and databases that cover core disciplines, related fields and emerging topics.

## For influence and impact

The research we publish travels the world. As one of our authors, your work will be seen by a global audience in journals with an average impact factor of 6.593 – raising your profile and supporting international scientific progress.

## For inspiration and ideas

Chemistry has unlimited potential to change lives for the better. Our publications are gateways to knowledge that can enhance R&D, drive innovation and help to solve some of the world's biggest challenges.

## Books and reference works in your field:

# Environmental Science Nano

Nanomaterial applications and interactions with environmental  
& biological systems

# About the journal

*Environmental Science: Nano* is the leading journal dedicated to nanomaterial applications and interactions with environmental and biological systems. Our scope is highly interdisciplinary; we welcome research that aids fundamental understanding of how nanomaterial properties affect their reactivity, environmental fate, and toxicity in a range of environmental and biological media/systems, as well as research which furthers our understanding of how nanomaterial properties can be controlled to optimise the benefits of a particular technology. Specific topics include:

- Rational design
- Life cycle implications
- Quantifying the benefits and risks of nanomaterial applications
- Biological uptake and ecotoxicity
- Novel applications for water, air, soil, food and energy
- Characterisation in biological and environmental media
- Nano–bio interactions
- Environmental fate, reactivity and transformations
- Environmental remediation

We publish innovative, high impact research – our impact factor of 6.087\* places us in the top 7% of journals indexed in the Environmental Sciences JCR category. Editor-in-chief Peter Vikesland (Virginia Tech) guides our team of international associate editors (John Fortner, Zhang Lin, Iseult Lynch, Joel Pedersen, Kristin Schirmer and Wei-Guo Song) who handle all submissions through peer review – maintaining our high acceptance criteria. We are committed to providing exceptional customer service right through from receipt to publication. Our times to publication are rapid\*\*, plus, as a journal published on a not-for-profit basis by the Royal Society of Chemistry, we are committed to supporting the global scientific community through our charitable activities such as education, outreach, events, science policy and more.

# Content highlights

---

## Challenges in characterizing the environmental fate and effects of carbon nanotubes and inorganic nanomaterials in aquatic systems

Peter Laux, Christian Riebeling, Andy M. Booth, Joseph D. Brain, Josephine Brunner, Cristina Cerrillo, Otto Creutzenberg, Irina Estrela-Lopis, Thomas Gebel, Gunnar Johanson, Harald Jungnickel, Heiko Kock, Jutta Tentschert, Ahmed Tlili, Andreas Schäffer, Adrienne J. A. M. Sips, Robert A. Yokel and Andreas Luch

*Environ. Sci.: Nano*, 2018, **5**, 48–63

[dx.doi.org/10.1039/C7EN00594F](https://doi.org/10.1039/C7EN00594F)

---

## Where is the nano? Analytical approaches for the detection and quantification of TiO<sub>2</sub> engineered nanoparticles in surface waters

Andreas Gondikas, Frank von der Kammer, Ralf Kaegi, Olga Borovinskaya, Elisabeth Neubauer, Jana Navratilova, Antonia Praetorius, Geert Cornelis and Thilo Hofmann

*Environ. Sci.: Nano*, 2018, **5**, 313–326

[dx.doi.org/10.1039/C7EN00952F](https://doi.org/10.1039/C7EN00952F)

---

## Engineered superparamagnetic nanomaterials for arsenic(V) and chromium(VI) sorption and separation: quantifying the role of organic surface coatings

Changwoo Kim, Seung Soo Lee, Brandon J. Lafferty, Daniel E. Giammar and John D. Fortner

*Environ. Sci.: Nano*, 2018, **5**, 556–563

[dx.doi.org/10.1039/C7EN01006K](https://doi.org/10.1039/C7EN01006K)

---

## Heteroaggregation of nanoplastic particles in the presence of inorganic colloids and natural organic matter

Olena Oriekhova and Serge Stoll

*Environ. Sci.: Nano*, 2018, **5**, 792–799

[dx.doi.org/10.1039/C7EN01119A](https://doi.org/10.1039/C7EN01119A)

---

## Experimental and theoretical calculation investigation on efficient Pb(II) adsorption on etched Ti<sub>3</sub>AlC<sub>2</sub> nanofibers and nanosheets

Pengcheng Gu, Jinlu Xing, Tao Wen, Rui Zhang, Jian Wang, Guixia Zhao, Tasawar Hayat, Yuejie Ai, Zhang Lin and Xiangke Wang

*Environ. Sci.: Nano*, 2018, **5**, 946–955

[dx.doi.org/10.1039/C8EN00029H](https://doi.org/10.1039/C8EN00029H)

---

## Using an environmentally-relevant panel of Gram-negative bacteria to assess the toxicity of polyallylamine hydrochloride-wrapped gold nanoparticles

Joseph T. Buchman, Ali Rahnamoun, Kaitlin M. Landy, Xi Zhang, Ariane M. Vartanian, Lisa M. Jacob, Catherine J. Murphy, Rigoberto Hernandez and Christy L. Haynes

*Environ. Sci.: Nano*, 2018, **5**, 279–288

[dx.doi.org/10.1039/C7EN00832E](https://doi.org/10.1039/C7EN00832E)

---

**Emerging investigator series: the rise of nano-enabled photothermal materials for water evaporation and clean water production by sunlight**

Peng Wang

*Environ. Sci.: Nano*, 2018, **5**, 1078–1089

[dx.doi.org/10.1039/C8EN00156A](https://doi.org/10.1039/C8EN00156A)

---

**Machine learning provides predictive analysis into silver nanoparticle protein corona formation from physicochemical properties**

Matthew R. Findlay, Daniel N. Freitas, Maryam Mobed-Miremadi and Korin E. Wheeler

*Environ. Sci.: Nano*, 2018, **5**, 64–71

[dx.doi.org/10.1039/C7EN00466D](https://doi.org/10.1039/C7EN00466D)

---

**Life cycle considerations of nano-enabled agrochemicals: are today's tools up to the task?**

Leila Pourzahedi, Madelyn Pandorf, Dwarakanath Ravikumar, Julie B. Zimmerman, Thomas P. Seager, Thomas L. Theis, Paul Westerhoff, Leanne M. Gilbertson and Gregory V. Lowry

*Environ. Sci.: Nano*, 2018, **5**, 1057–1069

[dx.doi.org/10.1039/C7EN01166K](https://doi.org/10.1039/C7EN01166K)

---

**Ni–Mn LDH-decorated 3D Fe-inserted and N-doped carbon framework composites for efficient uranium(VI) removal**

Jiahui Zhu, Qi Liu, Jingyuan Liu, Rongrong Chen, Hongsen Zhang, Rumin Li and Jun Wang

*Environ. Sci.: Nano*, 2018, **5**, 467–475

[dx.doi.org/10.1039/C7EN01018D](https://doi.org/10.1039/C7EN01018D)
