Why mapping the SDGs at UNIGE?

- To raise awareness:
  - ✦ internally about the SDGs
  - ✦ externally about the courses linked to SDGs

- To stimulate inclusion of SDG-related issues in the continuing education programmes

- To allow the faculty and participants to actively take part in the Geneva 2030 ecosystem
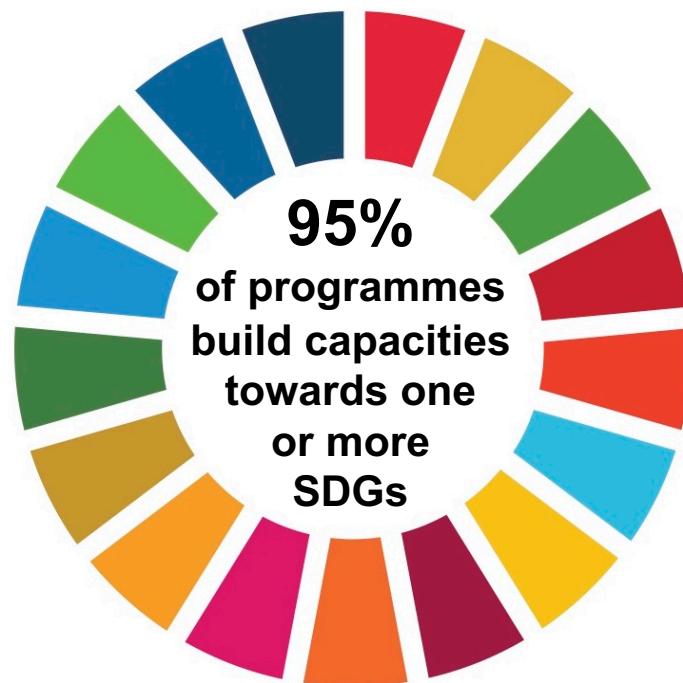

UNIGE Continuing Education in 2020

354 programmes
30% in English or bilingual

12 fields

- Global and Humanitarian Affairs
- Communication
- Law
- Economics and Management
- Education
- Environment and Sustainable Development
- Information Technology
- Languages, Cultures and Civilisations
- Psychology
- Health
- Translation and Interpretation
- Society

95% of programmes build capacities towards one or more SDGs

UNIVERSITÉ DE GENÈVE

Our main challenges while mapping

- Getting clearance from all faculty members

- Keeping the mapping updated (new programmes and curriculums, throughout the year)

- Selecting addressed SDGs through targets and not SDGs (internal training and additional time was needed)

Good news from our mapping

- High level of interdisciplinarity of our programmes (several fields cover one SDG)

- The mapping is an important communication tool

- It shows the evolution of the involvement of UNIGE in addressing the SDGs year after year

- Economy and Management courses seem to be predominantly addressing the SDGs
