DE GENÈVE

SUBMERGED PREHISTORIC LANDSCAPES

For more information:
unige.ch/genevasummerschools

- **WHAT?** An intensive course on a new, multidisciplinary scientific field: Continental Shelf Prehistoric Research (CSPR). The course will take place in Porto Cheli (Greece), and include field trips to the prehistoric site of Franchthi Cave and surrounding area
- **FOR WHOM?** For postgraduate students and young scientists who wish to move across the boundaries of marine geosciences and archaeology, in order to shed light on the interactions between our ancestors and the dynamically changing environment
- **BY WHOM?** Teaching by the University of Geneva faculty and renowned experts from international universities or institutions
- **WHY?** A unique opportunity to understand paleoclimate and sea level change and their interaction with isostatic and tectonic vertical movements, and to link them to the archaeology of people who lived on and migrated across the continental shelf

COURSE DIRECTORS

Dr. Julien Beck

Archaeology
University of Geneva

Dr. Dimitris Sakellariou

Hellenic Centre
for Marine Research

Tuition fees: **750 CHF**

Equivalence of **2 ECTS** credits
