

How to create a link for your application with Dropbox

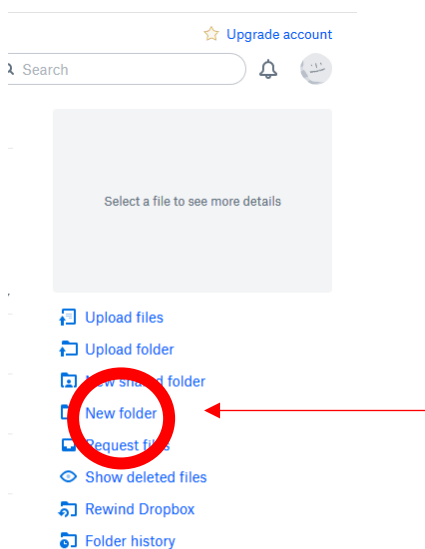

The easiest way is to first create a gmail account or a dropbox account.

Creating a link on Dropbox

- 1) Log in to your dropbox account (You can use your gmail to log in to dropbox), then click on « File » in the menu on the left side.

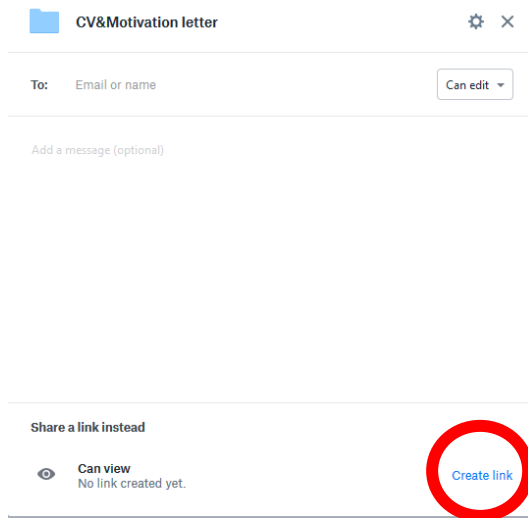

- 2) Click on “New folder” in the menu on the right side. You can name your new folder ‘GSS Application’, for instance.

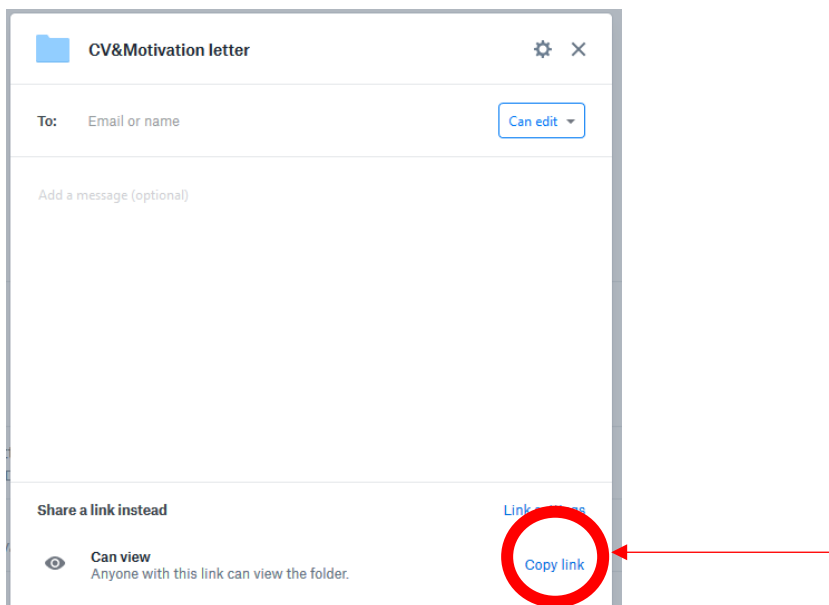

- 3) Open the folder you have just created, then drag and drop your files in it. Once you have successfully uploaded your files in the folder, go back to the main menu and click on « Share » in your folder menu.

- 4) Click on « Create link » at the bottom of the page.

- 5) Your link is ready. Click this time on « Copy link ».

- 6) The link will appear. Copy the link and paste it on your application for the Geneva Summer Schools.
