

# Deep View Camera Revolutionising Breast Cancer Surgery

## GROUNDBREAKING IMAGING GAMMA CAMERA INTEGRATING AUGMENTED REALITY

- **Unparalleled Portability:** wireless device (350 g) for unprecedented mobility in the operating room
- **Rapid Imaging:** Scan in few seconds 10 cm<sup>2</sup>, significantly speeding up the surgical process.
- **Multi-Node Detection:** Enables imaging of multiple nodes in a single scan, improving efficiency and accuracy
- **Precise 3D Localization:** Accurate 3D positioning of nodes, enhancing surgical precision.
- **Augmented Reality Integration:** Overlays images directly on the patient's body, for an intuitive guidance for surgeons.
- **Seamless Surgical Workflow Integration:** Designed to fit effortlessly into existing surgical protocols, minimizing disruption.
