## PART I: CODING INSTRUCTIONS

### Structure of Alternative Action Organizations (AAOs)

An instance of AAOs is a unit of strategic actions in the public sphere which are not operated/fully supported by mainstream economic and political organizations (i.e. corporate, state, or EU related agencies). An AAO engages in actions aiming to provide citizens/people alternative ways of enduring day-to-day difficulties and challenges under hard economic times, which relate to urgent needs, the environment, communications, the economy, alternative consumption/food sovereignty, self-organized spaces, culture, and others. The acting-organization can be formal or informal (citizens initiatives, NGO's, social movement organizations, local government organizations, the church, etc.).

### Unit of analysis

The unit of analysis is the “alternative action organization” (AAO). The alternative action organization is “a collective body/unit which organizes collective events carrying out alternatives to dominant socio-economic and cultural practices with visible beneficiaries and claims’ on their economic and social well being – including basic needs, health, lifestyles, as depicted through the AAO website/online sources.

### Locating Alternative Action Organizations

Alternative Action Organizations are drawn from related national hubs/subhubs which have been identified by each country team and ranked according to two criteria: inclusiveness and diversity in terms of geographic origin and alternative action types coverage, together with the number of websites they contain. AAOs websites have been extracted from the databases of the highest ranked hubs/subhubs through a systematic process, while the resulted national populations have been checked for their adequacy – in terms of the above mentioned criteria, with a preview of their geographic dispersion and the percentages each action type contains.

### Sample Selection and Criteria of Inclusion

A random sample should be selected from the final “All-lists” of each country’s AAO websites using the following process: A list of random numbers will be generated and associated to the websites of your country lists, following a procedure similar to WP3 – except that the websites are ranked in alphabetical order – instead of chronological, as in the case of newspaper articles. This can be done with a random number generator, such as the one offered by Excel. By selecting the respective option in the file containing the final list of websites, a list of random numbers is generated in Excel, whereby each number is associated with a website. Then, the entries will be reordered according to the list of random numbers, so that the websites become randomly ordered. Thereafter, coding begins from the first AAO website of this newly reordered list until the quota of websites to be decided (500-700) is completed.

AAOs are coded only to the extent that they are active within the time frame of the recent global economic crisis (i.e. **at least between 2007 and 2016**) and offer related information as above – this applies to countries such as Sweden or Germany, which are not experiencing economic crisis as a nation, but where AAOs engage in alternative actions.

### CASES TO EXCLUDE:

1. State (central)-related organizations as sole organizers of alternative action
2. EU-related organizations as sole organizers of alternative action
3. Corporate-related organizations as sole organizers of alternative action [corporate social responsibility action]

## Summary of general coding rules

- For AAOs without urls, run a brief (3-5min) google/other engine search. If you cannot find any website, blog or facebook page, or a hub/subhub offering at least: name of organization, location, type of solidarity, time) then leave this AAO and go to the next one in the random list.
- AAO online media outlets (websites, facebook, blog, twitter, hub) are coded only to the extent that they are active within the time frame of the recent global economic crisis (i.e. **at least between 2007 and 2016**) and offer related information as above – this applies to countries such as Sweden or Germany, which are not experiencing economic crisis as a nation, but where AAOs engage in alternative actions.
- Code online media outlets by organizations/networks/groupssimilar to the “Type of Organization” ORGTP, which are involved in alternative practiceslike those in “Types of Solidarity Activities”ACTTYP.
- The online media outlets organization must operate in the country under study: i.e. have offices **or** carry out solidarity activities in one of the nine countries of LIVEWHAT. Alternative actions by other national/transnational actors that take place in the home country are also coded.

## Group 1: Profile of Online Media Outlets

### Umbrella features of AAO

“An umbrella organization is an organization that controls or organizes the activities of several other organizations, all of which have a similar purpose”(Cambridge dictionary definition).  
Networks are sets of nodes linked by some form of relationship, and delimited by some specific criteria.  
Nodes may consist of groups, organizations, and other entities (Diani 2003: 6) (e.g. initiatives)

**Value of AAO**

Value frames are used to code the framing of alternative actions undertaken overall by an organization, i.e. the values upon which these actions draw in order to take their fundamental meaning. Value frames may be latent or manifest within the organization's websites textual information. Most of the times they can be easily traced in the front/main page of AAO's website or under the sections home/ who we are/ mission/ about. Take into account the order in which AAO presents its values, if they are so reflected in the contents of the website.

**Value of AAO (VAL1-3)**
