

# Lay out of the cohort information for the CITB Biobank

**Cohort Name :**

Chronic kidney disease after acute kidney injury: human mechanisms of transition (AKI)

**Principal Investigator :**

Dr. David Legouis, Médecin chef de clinique, Service des soins intensifs, Département de Médecine aiguë.

Professeur Sophie de Seigneux, Service de Néphrologie, Département de Médecine.

**E-mail :**

[david.legouis@hcuge.ch](mailto:david.legouis@hcuge.ch) et [Sophie.deSeigneux@hcuge.ch](mailto:Sophie.deSeigneux@hcuge.ch)

**Address :**

Service des Soins Intensifs, Département de Médecine aiguë, 1211 Genève14

**Institution :**

Hôpitaux Universitaires de Genève (HUG)

Rue Gabrielle-Perret-Gentil 4

CH 1211 Genève 14

**Description of cohort :**

Patients developing acute kidney injury during their intensive care unit stay and followed at 3 months and one year.

**Type :** observational and prospective

**Size :** 140 samples

**Gender :** Both

**Age :** >18 years old

**Storage temperature :** minus -80 C

**Material Type :** Plasma, Serum, Urine

**Available data :** Biological and Clinical data. Follow-up 1 year.

**Available diagnosis :** not available

**Sample access rules :** Open to applicants for research

**Ethical committee :** CER number 2017-00958

**Commercial collaboration :** No

**Non-for profit collaboration :** Yes

**Description of cohort :** Patients developing acute kidney injury during their intensive care unit stay and followed at 3 months and one year.
