

ONE WEEK MEDICAL SCHOOL

**Introduction to
clinical reasoning
for non-physicians**

June 22-26th, 2020
Institute of Global Health,
UNIGE

*The One Week Medical
School is developed by the
Institute of Global Health
at the University of
Geneva's Faculty of
Medicine.*

This is a one week long, full day intensive course focused on the fundamentals of clinical reasoning and the issues and challenges faced by doctors. It is designed for professionals or postgraduate students in the field of health with no formal medical training.

Program at a glance

Participants can register for the full week (June, 22-26: 2 ECTS) or a shorter 3 day course (June, 22-24: 1 ECTS)

The course is taught in English and is organized in the following format:

1. Lectures

- Monday 22 June** • **«In the mind of a doctor»:** Follow the daily life of a medical doctor through lectures relating to clinical reasoning, clinical examination, investigations leading to diagnosis, the doctor-patient relationship, the place of uncertainty in medicine and the role of medical ethics.
- Tuesday 23 June** • **«Family medicine and preventive healthcare»:** Explore clinical and physiological approaches to major public health challenges such as mental disease, drug use and cardiovascular disease.
- Wednesday 24 June** • **«From clinical presentation to disease management»:** Engage with numerous aspects of patient care including clinical aspects in neurology, diagnostic imaging and treatment options in oncology, quality of care and patient security. Get an overview of forensic and legal medicine.
- Thursday 25 June** • **«Pathway of life»:** Get insight into the specialties following all periods of life, from preconception to advanced age, with lectures on genetics, obstetrics and gynecology, pediatrics and geriatrics.
- Friday 26 June** • **«International health»:** Learn the fundamentals of microbiology and infectious diseases. Understand their practical application in tropical and humanitarian medicine and international health crisis management.

2. Workshops with standardized patients

Practical exercises at the Interprofessional Simulation Center (CIS Geneva).

3. "Walk in the footsteps of a medical doctor: a journey into the heart of patient care"

Only for full week participants: optional half-day immersion in a clinical department of the Geneva University Hospital.

Lecturers: S.Aebischer Perone, C.Bellone, M.Besson, M.Boulvain, O.Braillard, P. Briot, B.Broers, G. Eperon, T. Fassier, A.Flahault, A. Friedlander, G.Gold, S.Grabherr, A.Hamdani, S.Hurst, F. Jornayvaz, P.Linder, M.Nendaz, A.Perrier, M.Schibler, A-C. Rae, C. Sayoun, S. Vulliémou, D. Zoccatelli
