

# 10 things you should know about Private Philanthropy for Development

Geneva | 19 April 2018

Ewelina Oblacewicz

# Why does the OECD work on philanthropy?

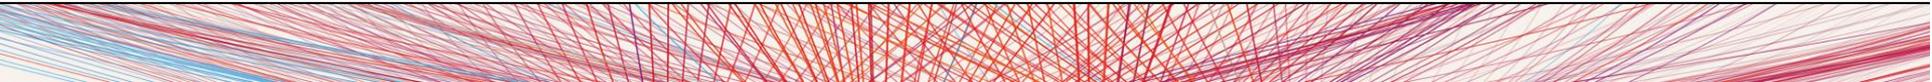

...to better understand **private philanthropy for development** in the context of:

---

...to update the **2003 OECD report on Philanthropic Foundations and Development Co-operation**

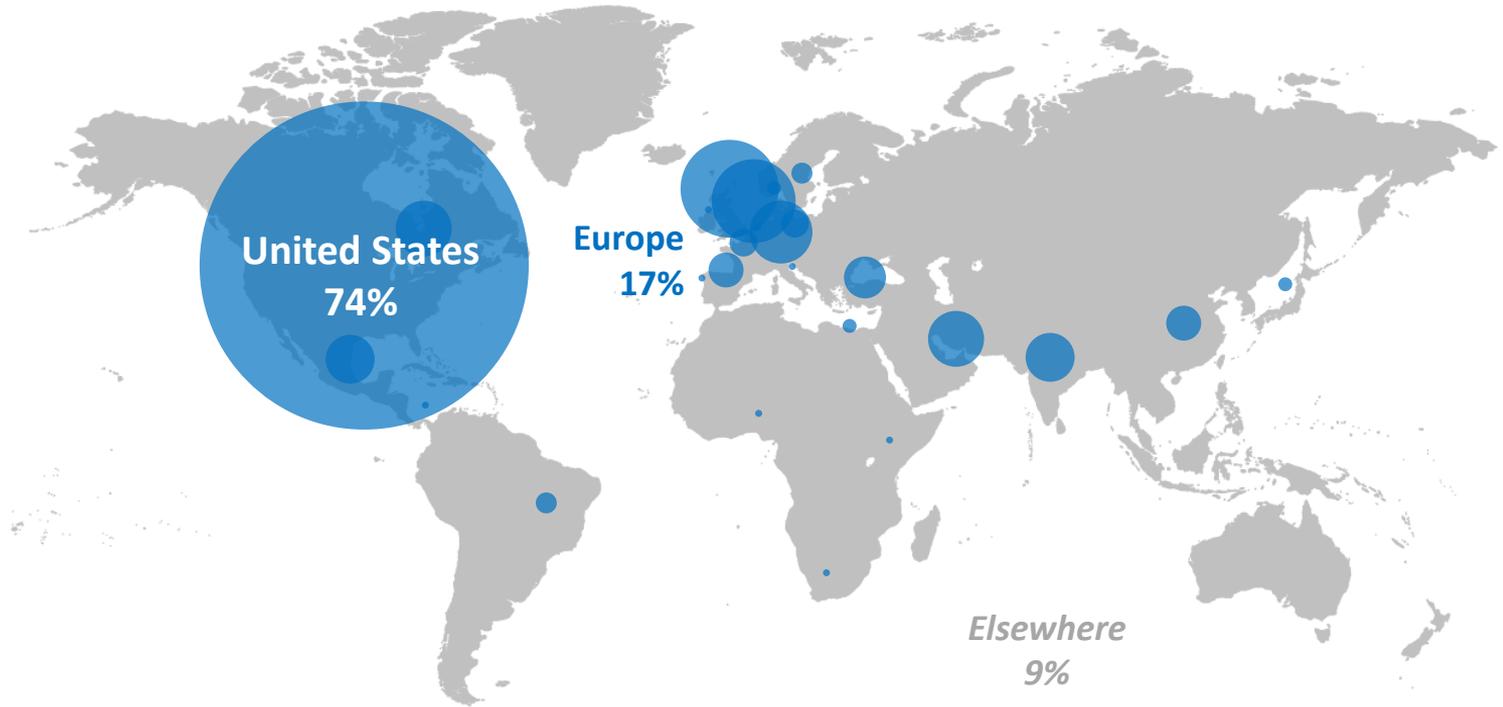

---

# Data collection

- **A major cornerstone of the report**, but also part of the OECD broader efforts to:
  - Enhance the **coverage and quality of the OECD statistics** on financing for sustainable development beyond ODA
  - Get a better understanding of the **'big picture' of resource flows** to developing countries
- Structured in two questionnaires:
  - **Data** questionnaire (applying OECD statistical standards)
  - **Qualitative** questionnaire
- Conducted by the OECD Network of Foundations Working for Development (netFWD) and OECD Development Co-operation Directorate

# USD 24 billion of giving in 2013-15 by 143 foundations

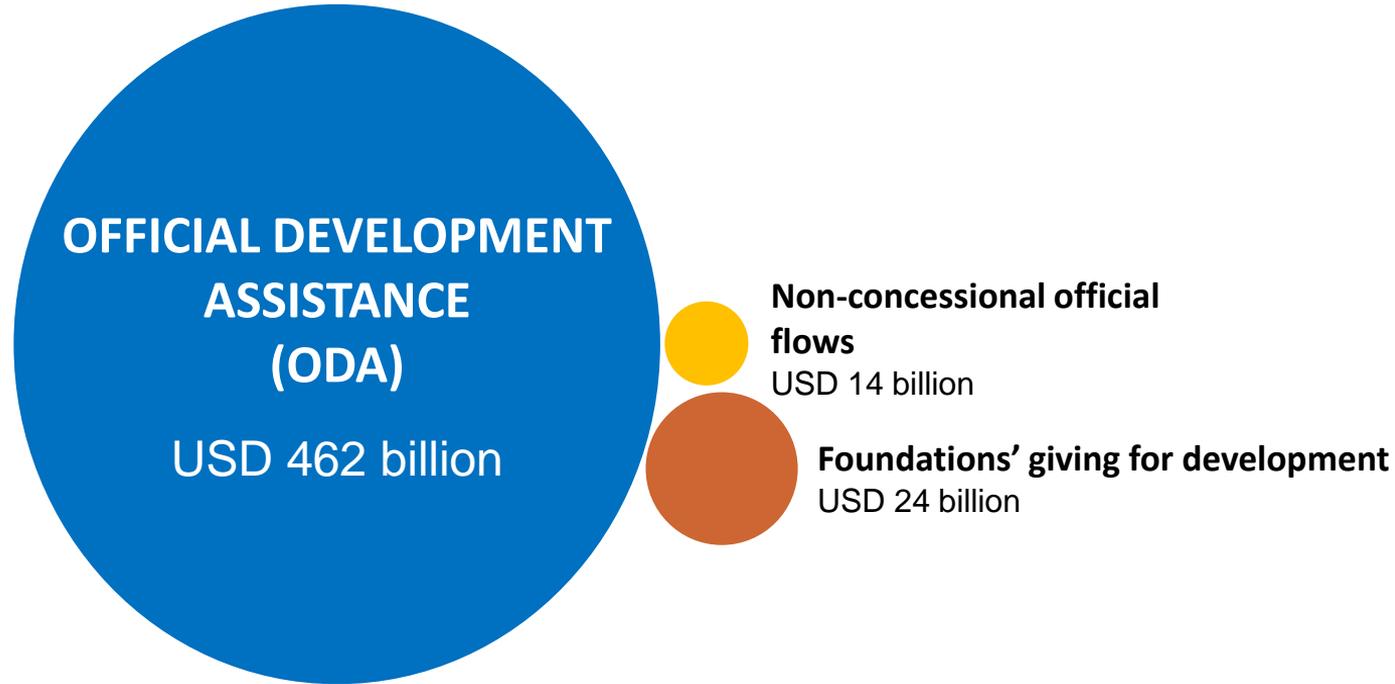

# Report

- Highlights **how much** foundations contribute to development
- Looks at **how foundations partner with other developing actors**, such as governments, donors and non-governmental organisations
- Challenges **what we think we know** about foundations and development

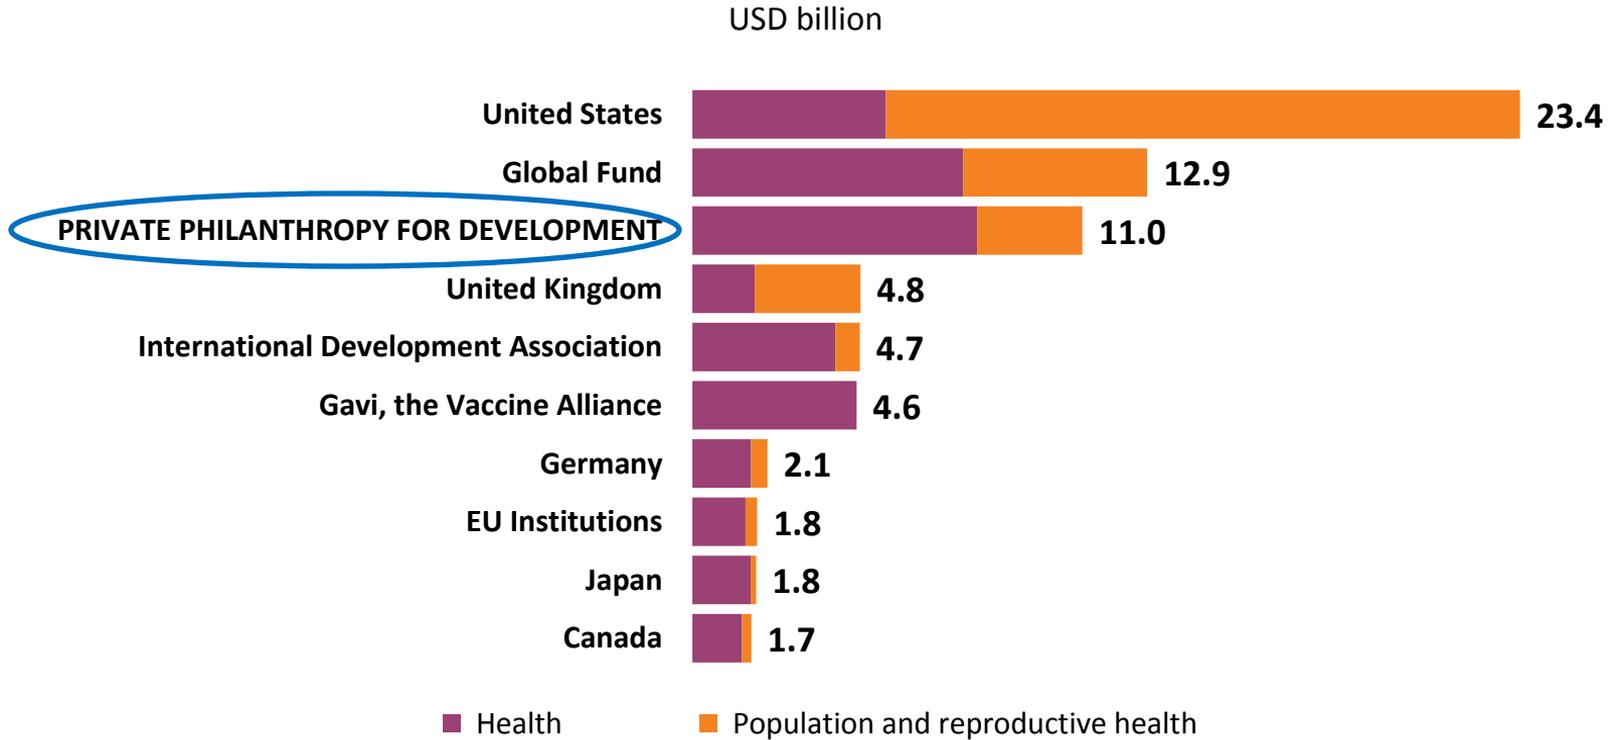

1

# Philanthropy is relatively modest when compared to ODA...

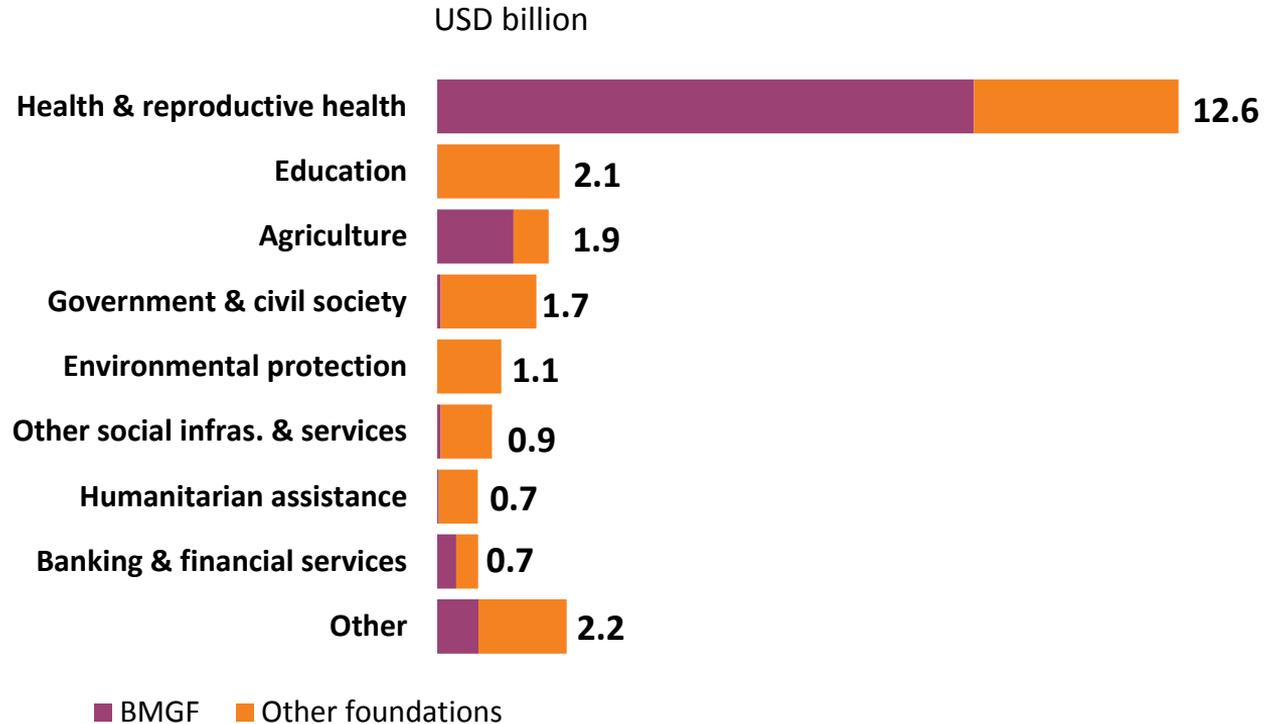

*2013-2015 average, current prices*

# 1 ...but key in some sectors, such as health

# 2

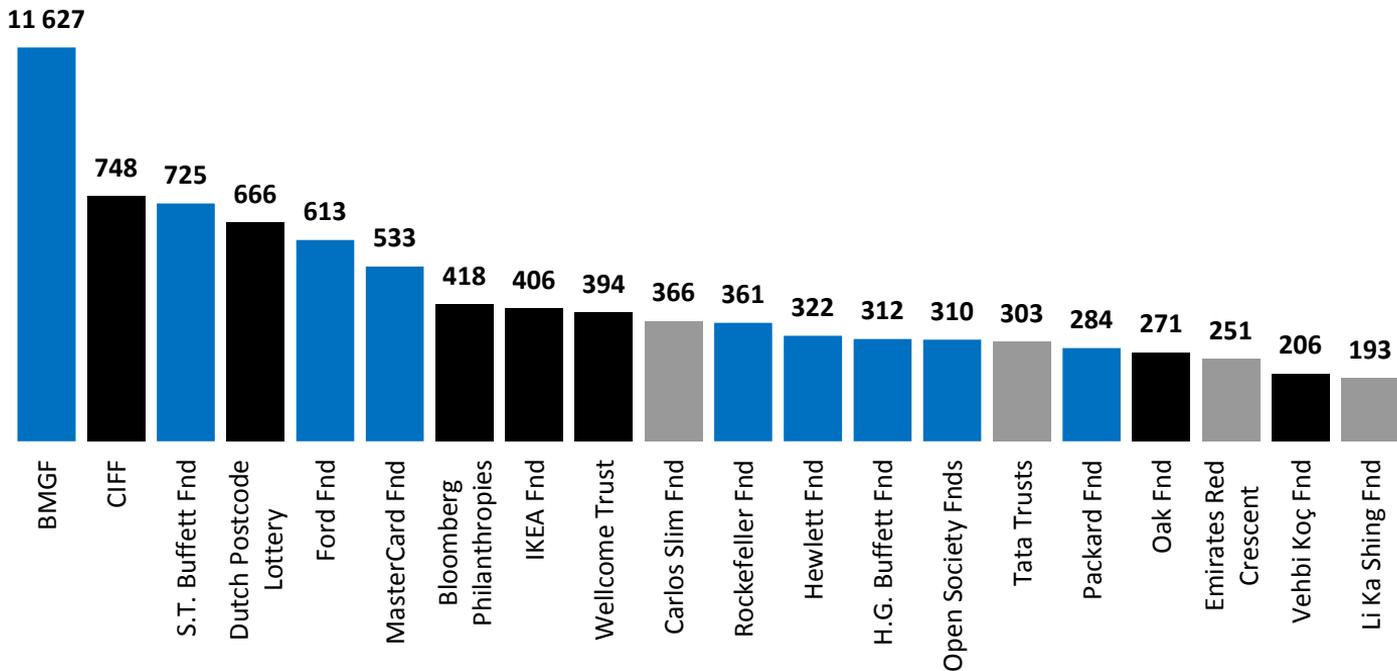

## Health is by far the main sector foundations give to, mainly because of Gates

# 3 Philanthropic giving is rather concentrated

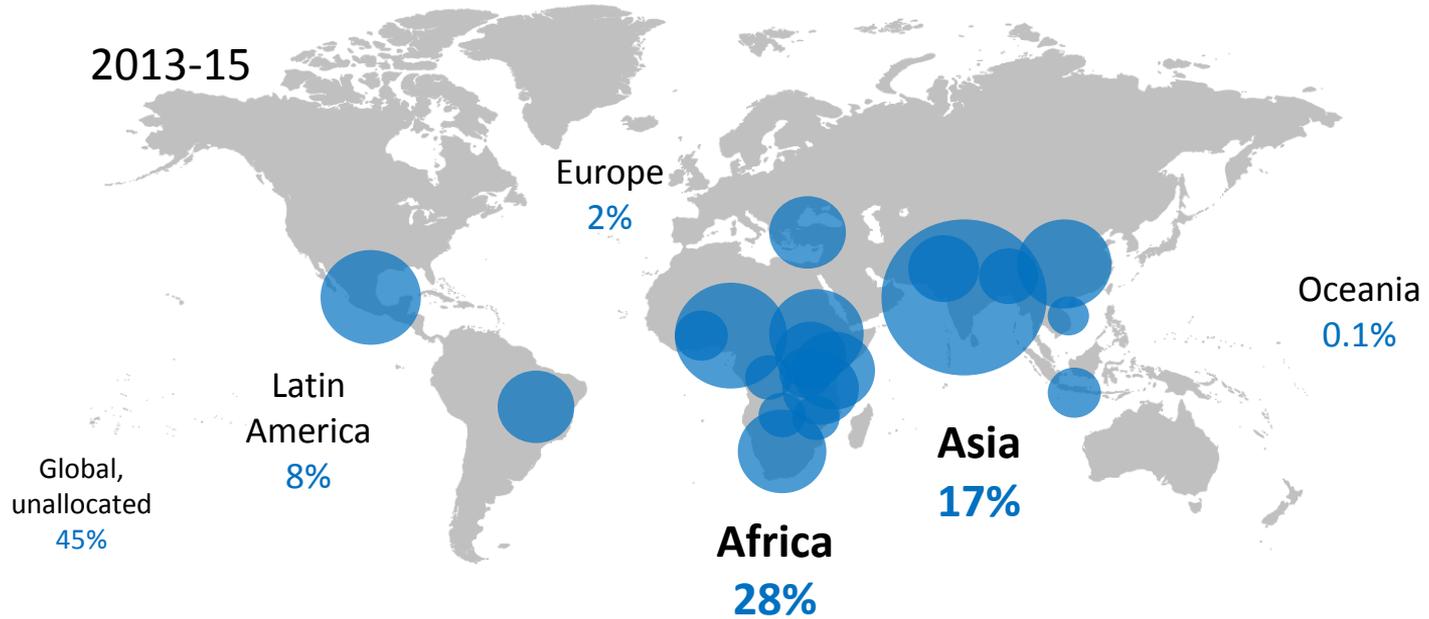

BMGF = 49%

Top 20 = 81%

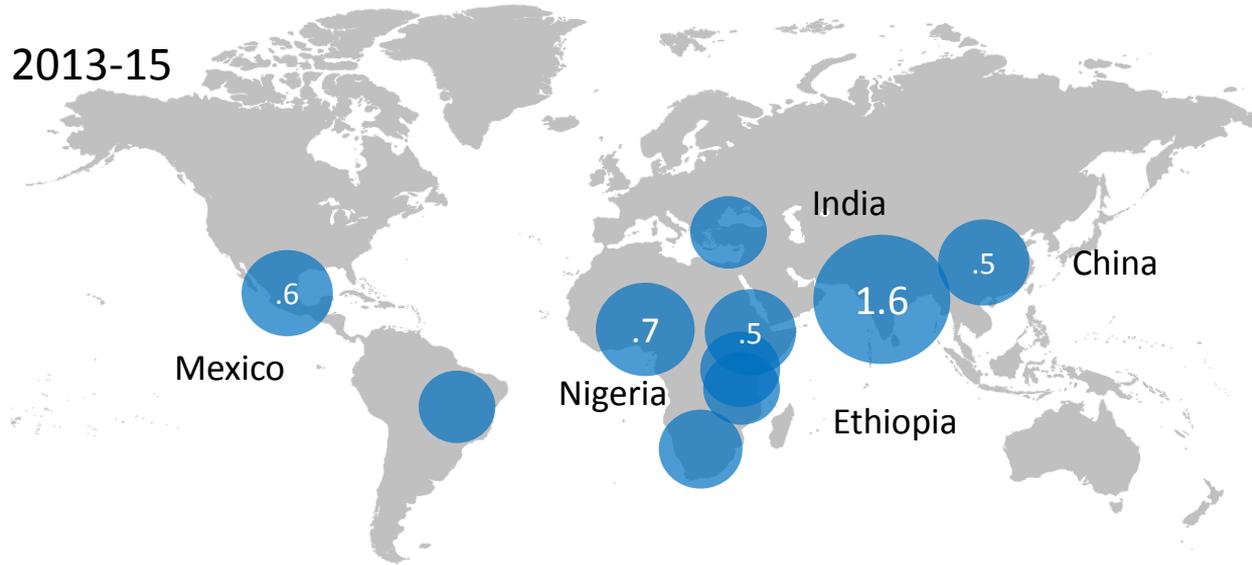

# 4

## Africa is the main beneficiary region

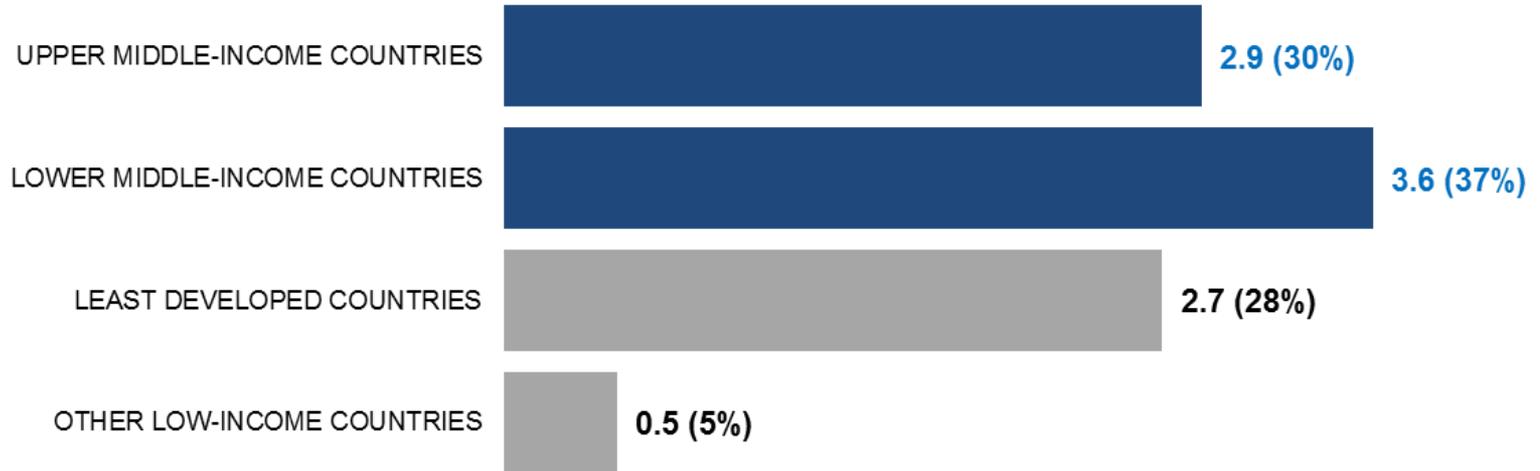

# 4

## India is the main beneficiary country

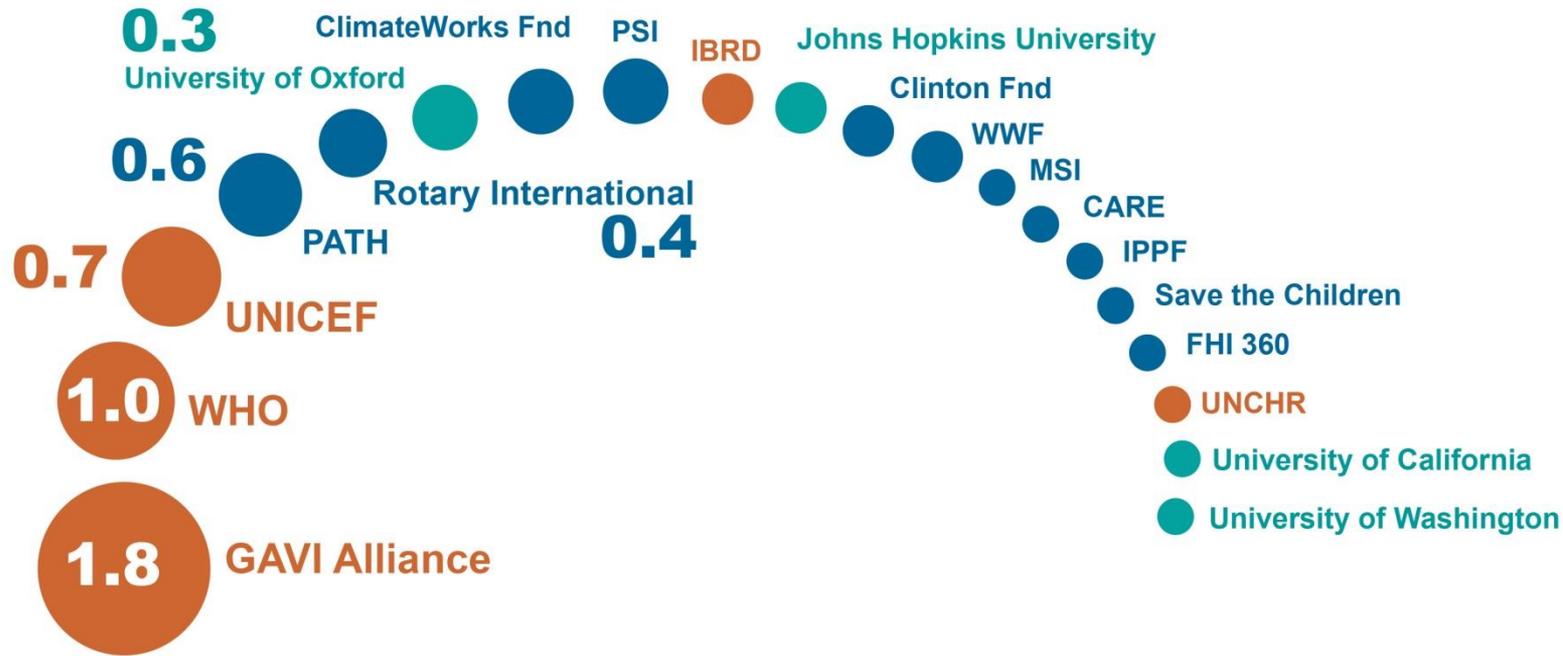

# 4 2/3 of funds go to middle-income countries

# 5

## Foundations invest through well-known large organisations

USD BILLION

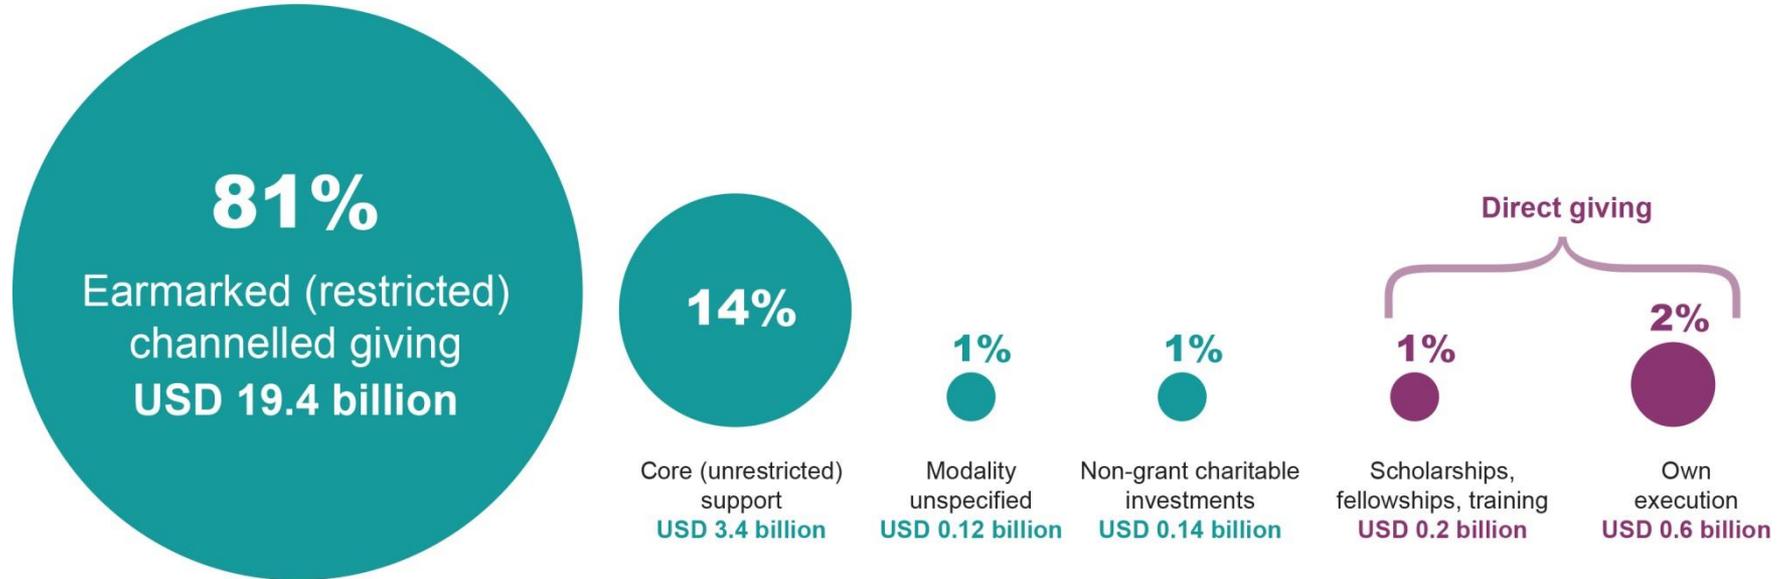

■ Multilateral organisation

■ NGO, Civil Society, PPP, Network

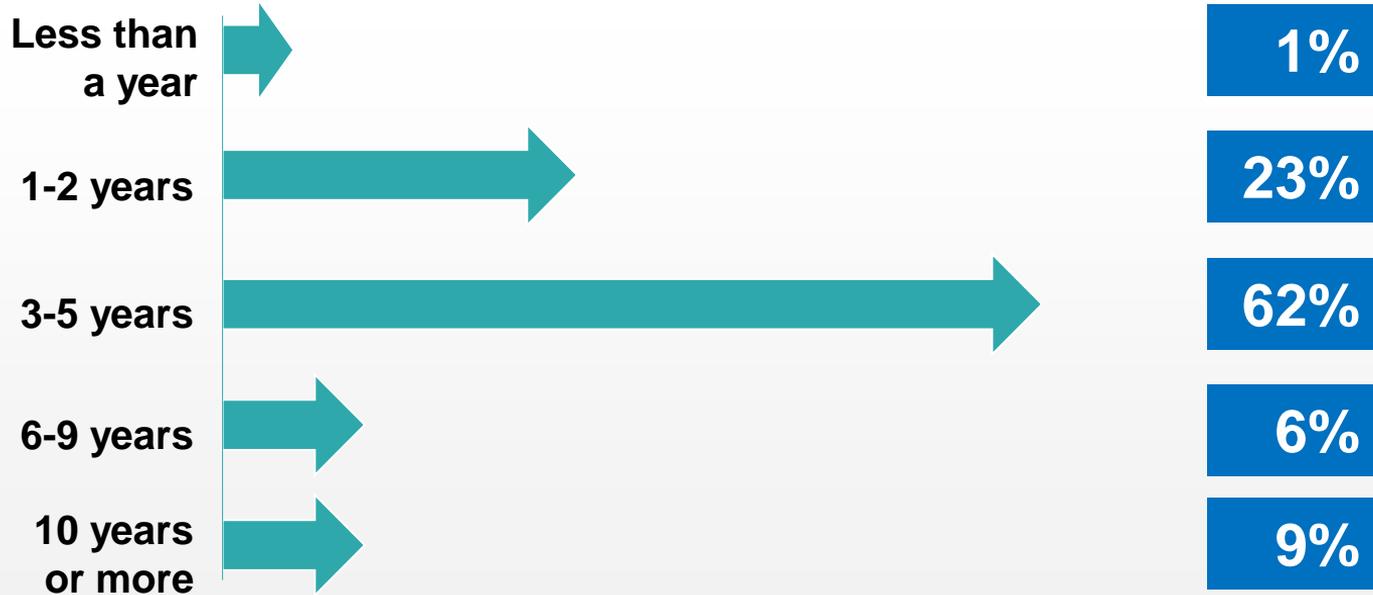

■ University, Research institute, Think tank

# 6

## Only a few foundations provide core or un-earmarked funding

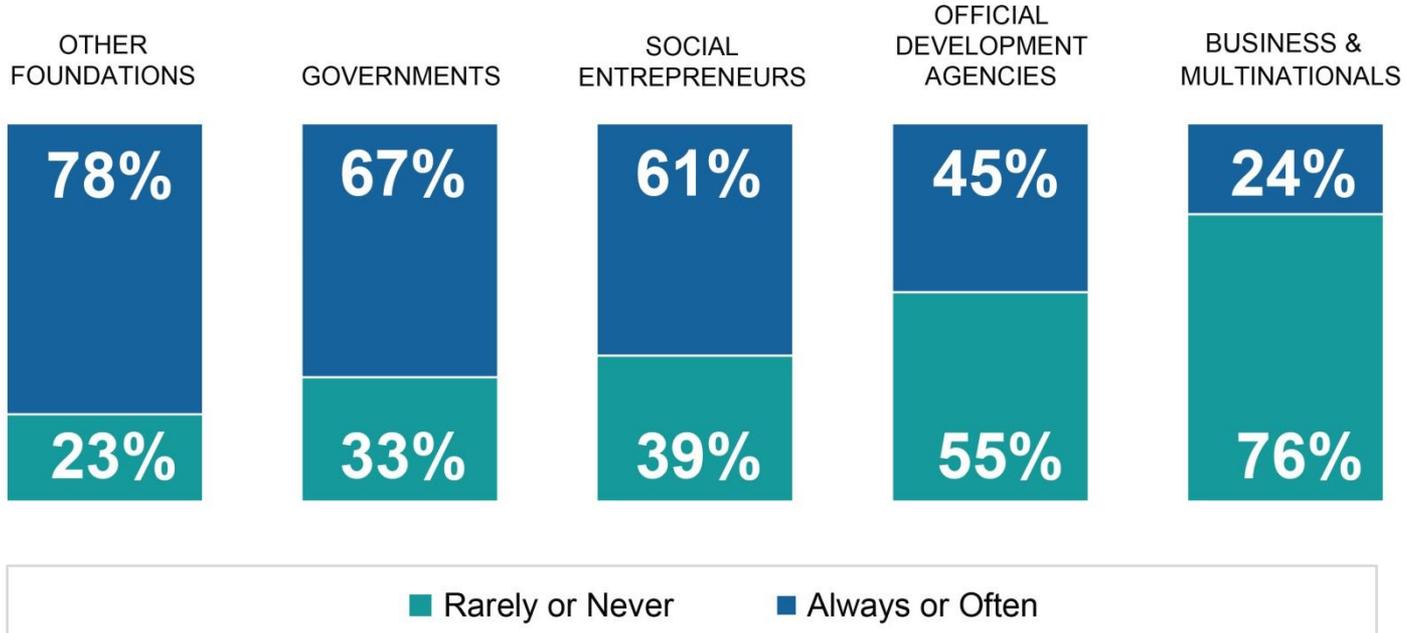

# 7 Long-term commitments are quite rare

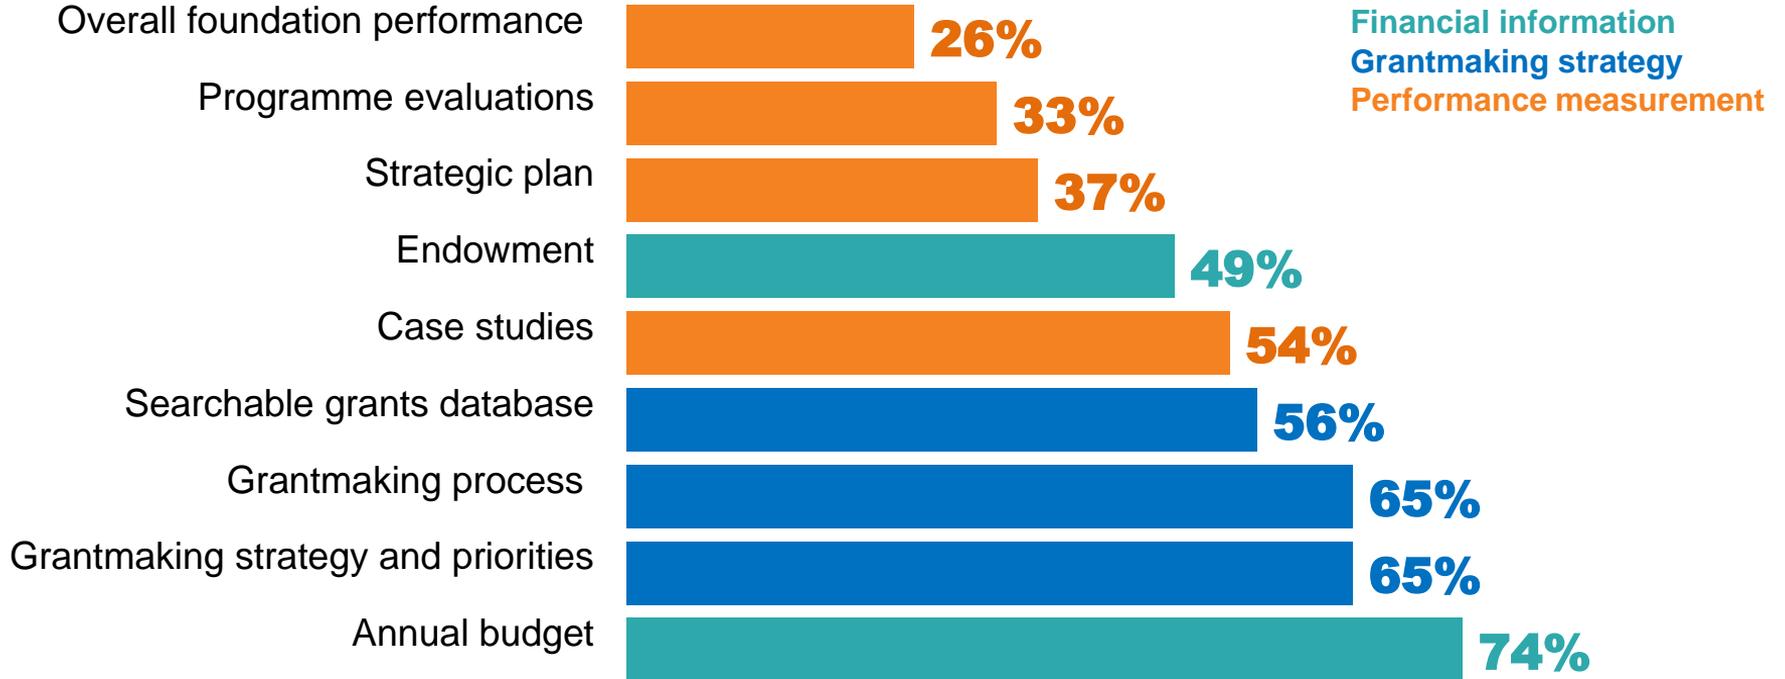

# 8

## Foundations value working with the public sector

## 9

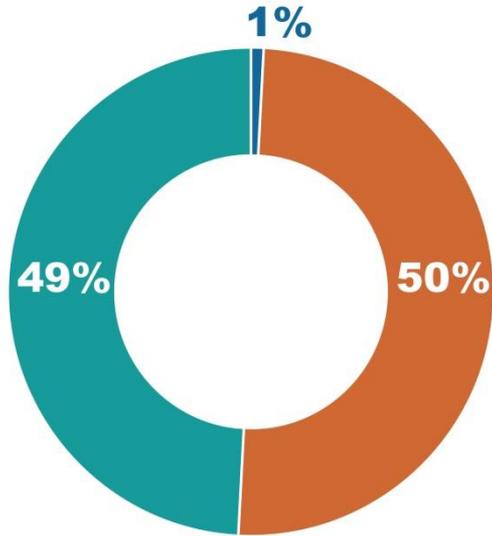

# Foundations are very cautious about sharing data

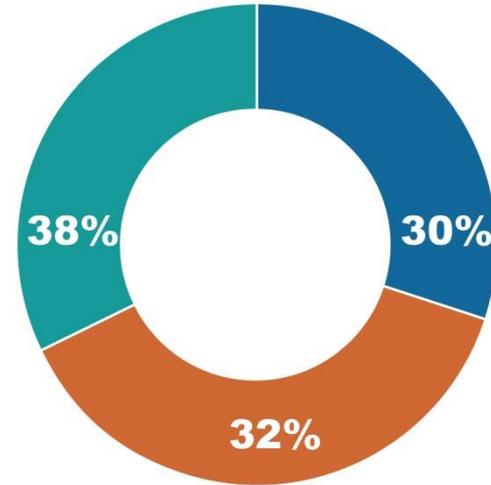

# 10

## Foundations are only starting to invest in impact evaluations

EVALUATION OF PROGRAMMES

EVALUATION OF FOUNDATIONS PERFORMANCE

Systemically Sometimes Never

**THANK YOU.**
