Today, the richest 1% of the population holds half of the world’s wealth. How did we arrive at this alarming state of affairs? What kinds of fractures has this extreme concentration of wealth wrought, be they economic, political, cultural, social, spatial, or environmental? And what space is there for progressive change in a context where those in power act to preserve the systems from which they benefit?

The roundtable will bring together thought leaders, influencers and advocates for change to discuss the growing influence of elite power and the deepening of global inequalities, and what can be done to counteract these trends.
