2019 SLLS SUMMER SCHOOL ON LONGITUDINAL AND LIFE COURSE RESEARCH

The SLLS Summer School on longitudinal and life course research is a one-week intensive program which brings together scholars from diverse backgrounds and introduces them to the main theories and methods in longitudinal and life course research. It is intended for post-doctoral fellows and postgraduate research students. The curriculum includes lectures and discussions led by expert researchers. Examples are drawn from a wide range of longitudinal data sets and illustrated with social and biological life course outcomes. Computer lab sessions develop practical and statistical skills for life course research.

LECTURES TOPICS | 26 - 30 AUGUST 2019 | NCCR LIVES, UNIVERSITY OF GENEVA (CH)

Themes being covered include

- Sociology and Demography of Life Course
- Life Course Epidemiology
- Life Course and Genetics
- Event History Techniques
- Multilevel Models for Life Course Processes
- Structural Equation Models (SEM) for longitudinal data
- Sequence Analysis Approaches

Keynote speaker

Ingrid Schoon, University College London (UK) and Berlin Social Science Center (Germany)

TEACHING FACULTY

David Blane	Imperial College London
Paolo Ghisletta	LIVES & University of Geneva
Hill Kulu	University of St Andrews
Ross Macmillan	University of Limerick
Dimitri Mortelmans	University of Antwerp
Karel Neels	University of Antwerp
Michael Shanahan	University of Zurich
Matthias Studer	LIVES & University of Geneva
Eric Widmer	LIVES & University of Geneva

PRACTICAL INFORMATION

Venue	NCCR LIVES, University of Geneva (CH)
Tuition	450 CHF
Application	Motivation letter, Curriculum Vitae (with list of publications) Application form
Registration deadline	May 31st, 2019
