Time series of SMOs (Italy)

File description:

Data on SMO membership and financial resources comes from a questionnaire sent to selected SMOs and from various additional sources. Missing values for the membership have been replaced with estimates based on the mean of the first and last actual values (when available), on a linear interpolation of actual values (i.e. adding or subtracting the same difference between the last two values, thus keeping the same increase or decrease) or by repeating the last available value (when more plausible, for example when the value for the first year of the series would be lower than to 0). Missing values for the financial resources have been replaced with estimates based on the number of paid staff (when available), on the mean of the first and last actual values (when available), on a linear interpolation of actual values (i.e. adding or subtracting the same difference between the last two values, thus keeping the same increase or decrease) or by repeating the last available value (when more plausible).
