14B673 Research Training (equivalent to 320h) **Mandatory** Autumn/Spring

14B951 Applied Statistics - TP over 2 and a half days on a personal computer **Spring Semester**

14B672 Computer Skills for Biological Research : an introduction to GNU/Linux and bash scripting - To be defined **Spring Semester**

14B023 Milestone in Plant Molecular Genetics selected chapters : The course is scheduled every other week An initial meeting will be scheduled at the beginning of the autumn semester - please contact : michael.hothorn@unige.ch

14B037 Molecular Plant Sciences - Applied Aspects : (alternating with 14B045) The course Molecular Plant Sciences is taught every Autumn alternating between Basic Research (14B035) in one year and Applied Aspects (14B037) the other year. Detailed information on the programme can be found under : <http://biveg.unige.ch/teaching/master/program/>.

14B035 Molecular Plant Sciences -Basic Research : (alternating with 14B037)

14B045 Introduction à la recherche en biologie moléculaire des végétaux : This course will be given every other week, an information session will be scheduled at the beginning of the school year - contacte : michael.hothorn@unige.ch

+ Elective courses : select from the list of the study plan of the orientation
