

ICECUBE NEUTRINO OBSERVATORY: VIEWING THE UNIVERSE FROM THE SOUTH POLE

Grand auditoire de l'Ecole de Physique
24, quai Ernest-Ansermet - Genève
Monday, September 15th • 20:30

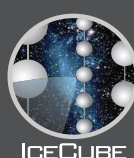

Wonder what it would be like to live at the South Pole? Blaise Kuo Tiong and Felipe Pedreros spent the long, dark winter monitoring the IceCube Neutrino Observatory. Hear about their adventure and see Chasing the Ghost Particle—a 30-minutes show that will take you from one of the most remote locations on Earth to the unexplored regions of the cosmos.
