

## A Resources-pooling centre

The **GCC** provides easy access to the skills of universities and the technological innovations of the industrial region and beyond, thanks to the reputation of its four founding partners and the legacy of its own projects.

## A Laboratory of ideas

By bringing together scientists, engineers and industries, the **GCC** promotes the emergence of ideas, allowing companies to explore new avenues and universities to promote scientific results and technical innovations.

## A Project incubator

The **GCC** is a dominant presence in the innovation process. From the emergence of ideas to their exposition to feasibility studies, the **GCC** nurtures innovative ideas until they grow into mature, solid projects.

## A Network of academia and industry experts

The **GCC** is actively developing a network of excellence and experts, closely following the latest technological trends, creating synergies of skills and unlikely encounters – all to the benefit of the local economy.
